## $\mu$ Module Power Products

Simplify Power

$\mu$ Module ${ }^{\circledR}$ Power Products Simplify Implementation, Verification and Manufacturing of
Power Circuits by Integrating Power Functions in a Compact Package.

15 Product Families $100 \mu$ Module Power Products 30 Package Options

Digital Power System Management
READ status from and WRITE settings to these $\mu$ Module regulators via a serial bus. (Page 21)

## High Power,

Precision Current Sharing
Parallel several $\mu$ Module regulators to deliver high power to a load with uniform distribution of load current. (Pages 18 \& 19)

### 1.82mm Ultrathin Packages

Place this family of $\mu$ Module regulators on the backside of the PCB or next to an FPGA or ASIC sharing the same heat sink or cold plate (Page 25)

## Ultralow Noise

This family of $\mu$ Module regulators have onboard filters and are EN55022 class B certified. (Page 11)

## Tune-a- $\mu$ Module

 RegulatorGain access to internal compensation of a $\mu$ Module regulator and tune loop response to obtain best output voltage accuracy, fast transient response and minimum output capacitance for powering FPGAs, ASICs and microprocessors. (Page 22)

## Buck-Boost

New product additions to this $\mu$ Module regulator family have integrated magnetics and operate from higher input voltage. (Page 11)

## Multiple Output

$5,4,3$, or 2 output $\mu$ Module regulators allow current sharing of outputs to increase load current and ON/OFF or sequencing of each output. (Page 10)

## Isolated

With integrated transformer this $\mu$ Module regulator family provides electrical isolation between input and output. (Page 11)

*Can be reduced with external bias supply
† LTM4601, LTM4601A, LTM4601HV and LTM4601AHV offer precision remote sense. Devices ending with -1 do not.
$\ddagger$ LTM4601A, LTM4601A-1 and LTM4601AHV have redundant pads for enhanced solder joint strength to the PCB.

${ }^{1}$ When internal remote sense amplifier is in use. See the Step-Down table on page 8 for maximum output voltage when the remote sense amplifier is not in use.
$\ddagger$ LTM4601A and LTM4601AHV have redundant pads for enhanced solder joint strength to the PCB.

## PCB Voltage Drop Compensation for Voltage Regulation at the Load

If PCB design limitations require the $\mathrm{DC} / \mathrm{DC}$ converter to be placed away from a high current load, the $\mu$ Module regulators listed above offer an onboard differential sense amplifier to correct for PCB IR drop voltage losses between $\mathrm{V}_{\text {OUT }}$ and $\mathrm{V}_{\text {LOAD }}$ as well as the ground return path. As a result, these devices guarantee voltage accuracy of $\pm 2.0 \%$ or better at the point of load, over line, load and temperature.

## Demonstration Circuits

All powermanagement $\mu$ Module regulators are available with demonstration circuits and user manuals. Demonstration circuits can be ordered through the Linear Technology website or by contacting your Linear Technology sales representative. Design files are available at www.linear.com/demo.

Tune-a- $\mu$ Module Regulator
Access and alter loop response of a $\mu$ Module regulator by adjusting compensation to achieve precision $\mathrm{V}_{\text {OUT }}$ at DC and transient based on the behavior of load as well as output capacitor type and quantity.

LTM4630-1, 1.0V at $36 \mathrm{~A} \pm 3 \%$ Transient Response

$25 \%$ Load Step Transient Response with $\pm 3 \%$ Output Regulation Window $12 \mathrm{~V}_{\mathbb{I N}}, 1.2 \mathrm{~V}_{\text {out }}, 36 \mathrm{~A}$ with $5 \times 220 \mu \mathrm{~F}$ Ceramic Cap

## Demonstration Circuits

Demonstration circuits（pages 10－13）along with associated bill of materials（BoM）and Gerber files are available for all products．Current sharing boards are available for select regulators．

## Package Mark Codes

The part number，lot number，date code and final assembly location are marked on the top of the package to facilitate product traceability．

The letter＂V＂following the part number indicates an LGA package．
The letter＂$Y$＂indicates a BGA package．The lot number consists of a single letter followed by three to five numbers．The date code consists of four numbers in a YYWW format and is commonly followed by a two letter code indicating the country of final assembly：MY for Malaysia and KR for South Korea．The＂e4＂or＂e1＂mark indicates a RoHS compliant package．

For example，the LTM8020 in an LGA package shown is from lot\＃J447 and was assembled work week 18 of 2009 in Malaysia．The LTM4676 in a BGA package is from lot\＃N67786 and was assembled work week 16 of 2012 in Malaysia．

LTpowerCAD II Power Supply Design Tool at www.linear.com/LTpowerCAD
LTpowerCADTM is a free and easy-to-use power supply design tool with a user-friendly graphical user interface (GUI) and powerful design features. It helps power supply designers to select a solution for given supply specifications, choose power stage components, estimate regulator efficiency and power loss, and optimize supply loop stability and load transient performance. It is a fast offline tool that runs on Windows PCs, and now includes a sync-release feature to ensure your program and component library are up-to-date. Once a circuit design is completed, it is easily exported to the LTspice - simulation platform.

Power Stage Design

Loop Gain and Load Transient Response Analysis

Efficiency and Power Loss Analysis

Part Search and Selection
LTspice Circuit Simulation Tool
LTspice is a free, simple and powerful circuit simulation tool with a library containing all Linear Technology products, as well as commonly used discrete passive and transistor components,

## Simple \& Done

Complete Power System-in-a-Package

## Over $100 \mu$ Module ${ }^{\circledR}$ Power Solutions

Our quickest, simplest and most integrated $\mathrm{DC} / \mathrm{DC}$ power solutions are complete systems-in-a-package with integrated inductor, MOSFET, DC/DC regulator IC and supporting components. With over 100 power solutions available, each $\mu$ Module product is qualified with Linear Technology's stringent electrical, package and thermal reliability tests. Simplify and speed your power system development with $\mu$ Module power products. Our $\mu$ Module products are available in both BGA and LGA packages.
