## Fieldline Modular Device With Eight Digital Outputs

This data sheet is only valid in association with the FLS FLM SYS INST UM E user manual or the user manual for your bus system (see "Ordering Data" on page 14).

## Function

The device is designed for use in the Fieldline modular local bus, which is opened by a Fieldline modular bus coupler. It is used to output digital signals.

## Features

- Connection to the Fieldline modular local bus using M12 connectors (B-encoded)
- Connection of digital actuators using M12 connectors, each with a load capacity of 500 mA (nominal current)
- Flexible voltage supply concept
- LED diagnostic and status indicators
- Short-circuit and overload protection of the actuator supply
- IP65/IP67 protection

## Connection Notes

Meet noise immunity requirements
Connect FE using a mounting screw or a cable connection to the FE connection latch (when mounting on a non-conductive surface).

Ensure degree of protection
To ensure IP65/IP67 protection, cover unused sockets with protective caps.

Avoid polarity reversal
Avoid polarity reversal of the supply voltages $U_{S}, U_{A}$, and $U_{L}$ in order to prevent damage to the device.

## Observe connection point

 assignmentWhen connecting the actuators, observe the assignment of the connection points to the OUT process data (see "Process Data" on page 8).
